

FORENSIC ENGINEERING & PROJECT SERVICES

INNOPRO offers a range of forensic engineering & project services. These services are provided to the insurance and legal industries, as well as direct to the engineering, industrial, mining and commercial sectors.

In addition to investigations and assessments, our professional and experienced forensic engineering & project team is able to offer remedial support on both a technical/engineering and project management basis.

Our services are offered nationally and internationally from our centralised Gauteng (Centurion) base.

INVESTIGATIONS AND ASSESSMENTS

Project assessments and audits (*multi-disciplinary*)

Investigation or assessment of matters related to electrical and/or electronic infrastructure and systems

- Independent technical audits, assessments and investigations
- Investigation of damage and claims
- Investigation of accidents and other incidents

Investigation of electrical fires

Investigation of electrical and/or electronic aspects or issues related to forensic fire investigations

Investigation or assessment of lightning related matters, including

- Fires potentially related to lightning activity
- Equipment and/or infrastructure damage
- Injury
- Risk assessment, remedial recommendations and design

Support to underwriting assessments in respect of electrical and electronic infrastructure and systems, lightning risk, and issues related to the above

REMEDIAL SUPPORT AND CONSULTING

Design of electrical and/or electronic infrastructure and systems, including replacement, repair and/or remedial design

Project management and/or consulting (*multi-disciplinary*) of remedial or replacement infrastructure and/or systems

Independent inspection/assessment of work done

ADDING VALUE THROUGH OUR PROFESSIONAL APPROACH AND SUPPORT

A thorough, objective and professional approach is the key driver in the provision of our forensic engineering services

All technical investigation, assessment and design work is performed or overseen by a registered **Professional Engineer**

All project management related work is performed or overseen by a registered **Professional Construction Project Manager**
